

# MACROSCOPE

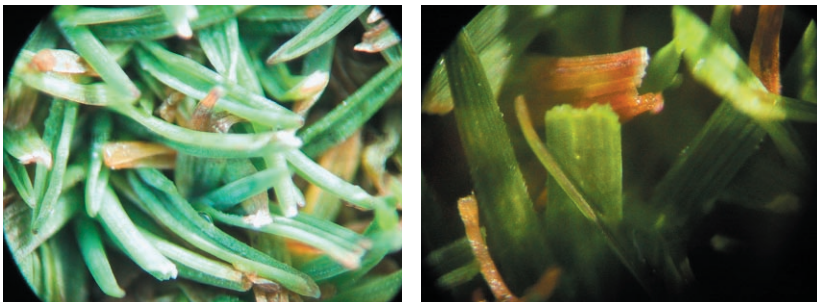

## See The Results Where It Really Counts... In the Turf!

Bernhard and Company, manufacturers of Express Dual and Anglemaster, bring superintendents two new instruments to take an up close and in-depth look at their turf.

### *The Superintendent's Stethoscope*

Without a stethoscope how can a doctor really keep on eye on his patients? Now, golf course superintendents have the right instruments to examine their patients.

We all know that a surgically sharp cut from mowers ground by Express Dual and Anglemaster is key to the health of the grass plant. Now you can take a closer look – inspect the quality of cut for yourself and see what your mowers are doing do the turf.

#### MACROSCOPE

- Lightweight and easy to use
- Get a detailed look at turf health
- Identify diseases, nutrient issues and other physiological conditions
- Observe what is really going with turf at 25X actual size
- Comes with durable carrying case

# PRISM GAUGE

## See The Results Where It Really Counts... In the Turf!

Looking for a way to ensure that all your cutting units operate at the same height of cut and leave smooth, clean edges?

### *Monitor Your Height of Cut*

We can all set our mowers in the workshop, but at what height do they really cut on the green? Are all your cutting units cutting at the same height? The Prism Gauge allows turf managers to view the cut and condition of their turf after being mown.

Put some science into your cutting practices and monitor your height of cut with a Prism Gauge.

#### PRISM GAUGE

- Determine height of cut
- Guarantee consistency in cutting units
- Robust, quality design
- Easy to read scale

Contact your local Express Dual distributor or call (888) 474-6348 to find out more.
